

Grading Level II

Course Objective:

Grading Level II is a two-day course that builds upon information that is provided in the Grading Level I course. The purpose of the course is to provide additional training to inspection personnel who are involved with grade and drain construction of roadways. It is also the intent to provide training for those individuals that are responsible for approving the progression of work associated with quality control /quality assurance in grade and drain construction. Topics discussed during the course include the following: construction and design of cut slopes in rock, geotextiles, karst topography (sinkholes), subgrade stabilization, structural backfill, pipe installation, and erosion control. Each individual that successfully completes the course will be awarded a Grading Level II qualification.

Who should attend this course?

State, contractor, and consultant personnel who are qualified as a Grade Level I inspector and will be responsible for performing and/or inspecting work within the topics described above. Contractor and consultant personnel who are responsible for overseeing quality control on KYTC grade and drain construction projects.

Note: Current or past Grading Level I qualification is a prerequisite for this course. However, Level I qualification does not have to be maintained current to be a Level II inspector, unless you will also be serving as a Level I (soil & aggregate base QC/QA) inspector on a project.
